

Different voltages available

SINGLESPEED

Single-phase 115V/50 Hz

Electric portable shape-milling machine

Fixed rotation speed

It shapes and finely finishes the edges of any stone material. The shaping process is realized into a number from 1 to 4 phases, according to the desired finishing degree. Thanks to the high rotation speed and the quality of GHINES TOOLS, achieving a perfect finishing is fast and easy: the diamond wheels must operate at maximum speed to obtain best cutting performances and longer lifetime.

This simple process keeps the same schedule and costs both on "simple" profiles (full bullnose, bird's beak etc) and on of bigger complexity.

SECTOR SINGLESPEED allows the use of diamond wheels only.

9500 rpm

The best compromise for performances
and diamond tools lifetime

SPECIFICATIONS

- **Spindle** (stainless steel)
Rotation speeds: 9500 rpm
Rise and fall: 35 mm
- **Frame:** die-casted aluminium housing
- **Power:** 2 kW
- **Supply tensions:**
single phase: 115V//60Hz, 230V/50-60Hz
three phase: 230V/50-60Hz, 4000V/50-60Hz
- **Thermal overload safety cut-out**
- **Machine:** 350 x 550 x 350 mm, 34 kg
- **Power unit:** 370 x 370 x 180 mm, 10 kg

Packing

Into wooden case, 760 x 410 x 540 mm, 59 kg

COLPO DROCCIO 9/2005

GLIDING SYSTEMS

Double gliding system

By choice you can have one of the two available different gliding systems, easy interchangeable.

AQUAWHEEL

AQUAPLANING

...anyway no scratch on the slab!

STANDARD SUPPLY

Plastic case containing

- use and maintenance manual with warranty certificate
- service wrenches
- set of bolts for shaped wheels
- spare fuses
- waterproof apron

The machine is built in conformity with the European Machinery Directives: - 89/392/CEE and following 98/37/CEE - EN 292 - EN 294 - EN 60204/1 or, at request in conformity with the Standard UL 508/A. for the North American market.
