

VEKTOR

PORTABLE STONE CUTTER

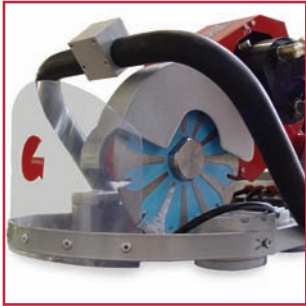

Oleodynamic portable stone cutter

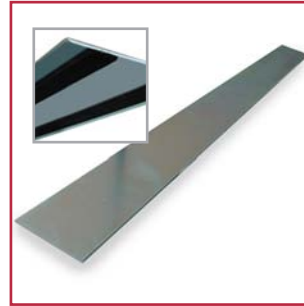

www.ghines.com

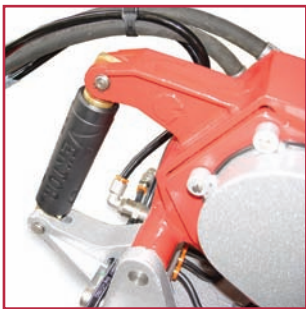

Oleodynamic portable stone cutter
It performs straight, circular and multidirectional cuts, on laid floors as well

The working process, whether it is a cut or a groove, is performed through the diamond disc mounted inside the protection cover.

Thanks to its versatility, VEKTOR can be mounted on a guide rail for straight cuts (included) or a caliper device for circular cuts (optional).

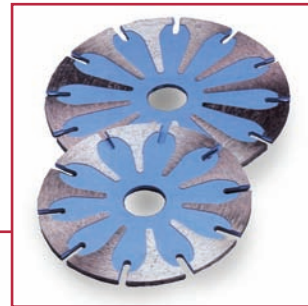

The vertical rise and fall is adjusted by rotating the back grip handle.

The "START" and "STOP" functions are operated by a low tension single button on the front grip handle.

VEKTOR is available with nylon rollers or veil of water gliding system (AQUAPLANING).

SPECIFICATIONS

- **Spindle** (stainless steel)
Rotation speed: 6550 rpm
(adjustable when using the optional SPEED CHANGE GEAR)
Rise and fall: 56 mm
- **Tool diameter** (max): 150 mm
- **Framework**: casted aluminium

- **Oil supply tubes** (length): 5 m
- **Electric starting control**
in low tension (24 V DC)
- **Dimensions, Weight**:
300 x 400 x 250 mm, 13 kg
- **Power unit**:
DARHTA 46 or DARHTA NK
oleodynamic units (not included)
