

PORTABLE ELECTRIC RAIL SAW

This high performing saw is made of stainless steel and aluminium components.

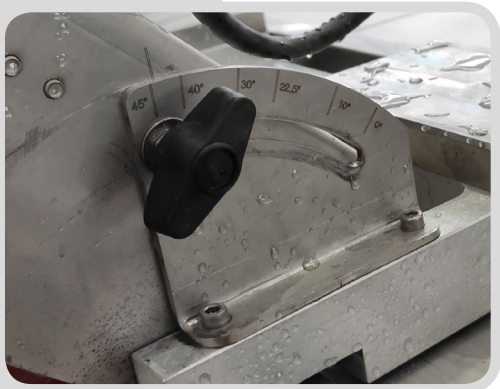

▲ The power of the motor guarantees inclined cuts at 45° up to 3 cm thick on all materials.

◀ Straight cuts up to 4 cm material thickness.

PORTABLE ELECTRIC RAIL SAW

▲ The safety of the operator is guaranteed by an “circuit breaker” system integrated in the electric cable supplied with the machine.

▲ The disc can be inclined up to 45°

STANDARD EQUIPMENT

- User and maintenance manual and warranty certificate
- Service wrenches
- Set of screws for discs
- Spare fuses

TECHNICAL DATA

- Mechanical structure in die-cast aluminium and stainless steel
- Stainless steel spindle
Rotation speed: 8000 rpm
- Power supply voltages: 230V/50Hz single-phase
115V/60Hz single-phase
- Residual current circuit breaker on the electric cable
- Thermal protection inside the motor
- Dimensions: 540 x 375 x 305 mm, weight 19.5 kg
- Recommended disc Ø180 mm (Ø max = 200 mm)
- Stainless steel rails: 1500 mm (connectable)
- Packing: in cardboard box

▲ The stainless steel sliding guides can be easily and precisely interconnected and guarantee cuts of any length.
